SAIMOON ADNAN

Dhaka, Bangladesh | +880 1600-627822 | adnansaimoon@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Computer Science undergraduate passionate about transforming data into meaningful insights and solving real-world problems. Proficient in Python, SQL, Power BI, and Excel, with a growing focus on Data Science and Machine Learning. Interested in uncovering patterns, understanding business challenges, and developing data-driven solutions that support smarter decision-making. Continuously expanding technical and analytical skills to bridge the gap between data analysis, business insights, and predictive modeling.

SKILLS

- Programming & Querying: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (PostgreSQL), C ++
- Tools & Platforms: Microsoft Power BI, Microsoft Excel, GitHub, Jupyter Notebook
- Core Competencies: Data Cleaning, Data Visualization, Exploratory Data Analysis, Customer Segmentation, Trend Analysis, Dashboard Reporting, Business Insight Generation

PROJECTS

Quantium Retail Analytics — *Customer Segmentation & Store Trial Evaluation*

- Analyzed 260,000+ retail transactions in Python (Pandas, NumPy, Matplotlib, Seaborn) to identify customer segments and evaluate trial store performance.
- Uncovered purchasing patterns and trends across product categories, translating findings into data-driven business recommendations.

Repository: github.com/saimoon-adnan/Quantium-Retail-Analytics-by-using-python

Zepto E-commerce SQL Analysis — *Sales & Demand Analysis*

- Built a PostgreSQL-based analytics project by cleaning raw e-commerce data and writing complex SQL queries (joins, aggregations, subqueries) to explore sales and demand trends.
- Generated business insights on inventory and pricing to support stocking and pricing decisions.

Netflix Movie Data Analysis — *Content Trend Analysis*

- Analyzed a dataset of 9,000+ Netflix titles using Python and Pandas to uncover genre trends and popularity patterns.
- Presented findings through visualizations highlighting content distribution and audience preference shifts.

EDUCATION

B.Sc. in Computer Science and Engineering — *Northern University Bangladesh* Expected 2028

Current CGPA: 3.71 / 4.00

CERTIFICATIONS

- Data Analytics Job Simulation — Forage (Quantium), Jun 2026
- Product Management Job Simulation— Forage (Electronic Arts) March , 2026
- SQL Intermediate — SoloLearn, Feb 2026
- Python Developer — SoloLearn, April 2026
- Data Analytics & Power BI — Interactive Cares
- Inventory Management — HP LIFE (HP Foundation), Feb 2026
